**No Moss** is a broad spectrum mossicide that controls both mosses and liverworts. It is derived from essential oils and other natural ingredients. These active ingredients are listed as food grade materials so **No Moss** is safe to use around children and pets. **No Moss** is exempt from EPA registration under FIFRA Sec. 25(b).

### Moss Damage
Mosses reduce plant root growth and compete for nutrients and water. Moss harbors other pests and creates unmarketable nursery crops. **No Moss** coats and smothers the spores and other vegetative structures and prevents moss rhizoids from growing into the soil surface. **No Moss** kills liverwort and moss and keeps plants clean and healthy.

### General Recommendations
**No Moss** is suitable for moss covered roofs, nursery containers, sidewalks, and other moss covered surfaces. And it can be used in lawns as a spot treatment application. **No Moss** is also suitable for commercial organic food production as well.

---

**Benefits of Using No Moss**
- Natural
- Safe to Use
- Biodegradable
- Non-toxic
